

AMBULANCE DISPATCH GUIDELINES

AMBULANCE DISPATCH GUIDELINES. Target response: 8 minutes urban, 15 minutes peripheral. Deployment is demand-based: units reposition hourly using the ambulance demand forecast. Each district keeps minimum coverage of 2 units; Gurugram, Connaught Place, Andheri and Koramangala require 4 during rush hours (08:00-10:00, 17:00-20:00). During flood alerts, ambulances avoid Minto Bridge Underpass, Andheri Subway and Silk Board Junction and use elevated corridors. Patients are routed per the hospital surge protocol ? never transport to a hospital above 90% occupancy except for immediate life threats when it is the nearest facility.
